Amjet executive global actor in business aviation

Who we are

Amjet Executive is driven by one man's lifelong passion for aviation. Captain Abakar Manany, airline pilot and entrepreneur, founded the company in 2009 with a clear vision: to put his profound experience and knowledge of the aviation industry at the service of business aviation travellers and private jet owners. The company's mission recognizes and highlights our clients' key priorities: Efficiency in Privacy.

What we do

Aircraft Charter Sales, Aircraft Management, Maintenance and Aircraft Sales & Acquisitions – Amjet Executive is structured to deliver excellence in every area of business aviation. Managed by a team of specialists who are 100% immersed in the industry, and manned by dedicated safety and maintenance engineers and the most highly trained cabin crew and pilots, Amjet Executive functions with the values of professionalism, exigency and service, established clearly by the founder from the very start.

How we operate

Amjet Executive has been operating under European AOC since February 2010, choosing Athens as the perfect strategic stepping stone between Europe, Africa and the Middle East. The location offers both favourable financial conditions for aircraft

owners and comprehensive aircraft maintenance standards in strict compliance with EASA (European Aviation Safety Agency) guidelines. Each aircraft in the fleet is gradually being included in the AOC.

For its charter sales activity, Amjet Executive has elected to establish itself in Geneva, Switzerland – the international hub for business aviation.

Our fleet

Our fleet of latest generation or recently re-furnished aircraft is both luxurious and versatile, addressing every specific purpose of travel - business, pleasure, formal government mission, group tours or urgent medical transport. We feature the full Dassault range encompassing the Super Midsize Jet, the Heavy Jet, the Ultra Long Range Jet, as well as a VIP Airliner and a VVIP executive airliner.

Amjet executive SA, European operator

Amjet Executive has been active as a European private jet operator since February 2010.

As such, we handle full responsibility for maintenance of the aircraft under our management, with a dual vision: to deliver the very best in terms of technical and engineering standards, and to safeguard the value of the aircraft. Similarly, our crews are among the most highly trained in the industry, with a duty to ensure the comfort and safety of clients with a fine mix of care and discretion.

In terms of geography, our operational base in Athens is ideally located at the intersection between Europe, the Middle East and Africa. In addition to favourable financial conditions for aircraft owners, Athens also offers a huge pool of industry expertise.

Amjet carries out maintenance of its fleet in accordance with constructors' guidelines and in compliance with the directives of the European Aviation Safety Agency (EASA), which are the strictest in the world. We work with several maintenance centers around Europe, selected with the strictest care and diligence. We ensure all maintenance work carried out is in compliance with EASA Part 145 requirements. Hence we are able to offer our clients geographical flexibility, coordinated by our team. We negotiate all maintenance charges, and pass the benefit of those competitive rates onto our clients.

The greatest evidence of our superior service is the trust and loyalty we have already gained from number of aircraft owners, thanks to the dedication and professionalism of our highly experienced teams, both on the ground and in the air.

Our fleet of latest generation and newly refurbished aircraft is available for charter, responding to requirements for a diverse range of travel purposes: business, pleasure, government missions or group tours. The medium-sized, large or very large cabins (Airbus 319-100 ACJ and the exclusive MD-83 Executive Airliner) offer great versatility and superior performance, all in comfort and style, to ensure our clients always enjoy Efficiency in Privacy.

Amjet executive services SA: our geneva-based charter sales department

Our Charter Sales service is strategically based in Geneva - international hub in the world of business aviation. With the strength of our name, our network of contacts, our infrastructure and our industry knowledge, we have everything in place to satisfy our select clientele:

- For the discerning business traveller, we can source the right aircraft for any type of journey at short notice, either from our own fleet or through one of our carefully selected partner operators.
- For the private jet owner, we have the tools to market the aircraft, hence generating significant revenue and optimizing the investment.

With Amjet Executive, businesses, individuals, governments and international organisations can be certain that they have called upon a partner capable of delivering a travel service that meets the highest standards in terms of security, discretion and professional care.

Our multilingual crew members follow regular, intense training and have all the qualifications required by European Civil Aviation to attend to the safety and comfort of passengers, and to maintain the aircraft on the terms required by the owner.

Amjet Executive, through its Charter Sales team and its impeccable crew, offers clients a seamless travel experience from beginning to end. Passengers will value the benefit of time optimization on every journey, whether their wish is to remain focused, productive and switched on, or simply to relax.

We offer Efficiency in Privacy.

Going forward

The rapid development of Amjet Executive is founded on a multidisciplinary team benefiting from many years' aeronautical and financial experience specifically in the sector of business aviation. Determined to offer a net qualitative difference in a highly competitive market, Amjet Executive has the assets required to guarantee its clients the prospect of long-term and responsible growth in a changing world.

With new plans and further results of our continued growth, we'll see you again in 2013!
